

Pharmacy Software Trainer

Kroll Computer Systems is the industry leader in the development and implementation of pharmacy software solutions in Canada. We have 50 young, vibrant employees, and are looking to expand on the great development team that we currently have in our Toronto office.

We are looking for motivated **software trainers** who can teach our **Kroll Windows** software product to pharmacists and pharmacy technicians. We train on-site at our customers' pharmacies, so you will get to travel throughout Ontario and Canada on a regular basis. When not visiting customers on-site, you will work in our Toronto office and help support our customers over the phone.

We are prepared to invest in your skills so that you can actively contribute to our comfortable and team-oriented working environment.

Successful candidates will work with minimal supervision and guidance and therefore must have sufficient experience in software training or educating others individually and in groups. Experience in the pharmacy industry is a requirement.

This position involves traveling, so all applicants must have a car and be licensed to drive. While some of the travel will be in Ontario, candidates must have the ability to travel across Canada and be willing to do so.

This job requires a 'people-person', and applicants should fit the following criteria:

- Strong command of the English language
- General awareness of current technologies
- Has excellent judgement and is able to work independently with minimal direction
- Has strong desire to succeed with an unparalleled desire to help the customer
- Has strong problem solving skills and an analytical mind
- Has ability to react quickly and work under stressful situations
- Is proud of his/her accomplishments

We invite you to send us your resume as soon as possible. Tell us in your cover letter who would win in a fight and why: the American Alligator or the Burmese python. Don't miss out on being a part of something special. If you are looking for a weekday office position or cannot travel, we have another opportunity available in our **software support specialist** position.

Visit our website at www.kroll.ca and email your cover letter and resume to HR@kroll.ca.
