Entering Intervention Codes

Intervention codes can be entered for new prescriptions or repeat prescriptions.

1. From the F12 Filling screen, go to Rx → Interventions/SA Numbers.

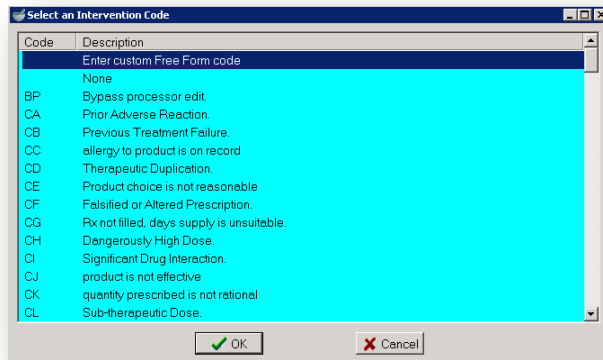

2. Enter an intervention by clicking **F2** located to the right of the **Intervention Code 1** field.

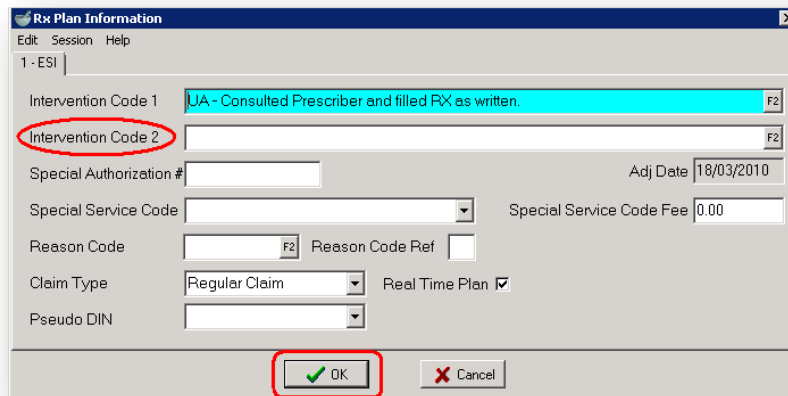

NOTE: Make sure the intervention code is being entered under the correct third party plan tab. There will be multiple plans tabs if the prescription is being sent to multiple plans.

- Highlight the applicable intervention code and click **OK** or press **Enter** on the keyboard to select.

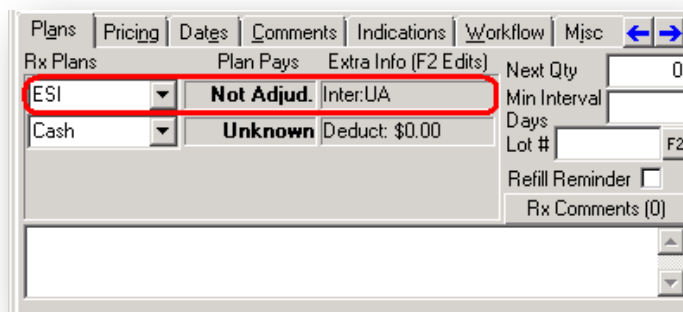

NOTE: Selecting **None** means that no intervention codes are being sent.

- A second intervention code can be added in the **Intervention Code 2** field.
- Click **OK** or press **Enter** on the keyboard to return to the prescription.

- Interventions being sent to a third party plan can be seen in the **Plans** tab of the F12 filling screen.
